ANNUAL INDEX

Acharya, Amit. *See* Slemrod, Marshall

Antman, Stuart S., and Süleyman Ulusoy. *The asymptotics of heavily burdened viscoelastic rods*, 437

Baig, Mirza M. Irfan. *See* Kausel, Eduardo

Ballew, Joshua, and Konstantina Trivisa. *Suitable weak solutions and low stratification singular limit for a fluid particle interaction model*, 469

Banks, H. T., D. Cioranescu, A. K. Criner, and W. P. Winfree. *Modeling the flash-heat experiment on porous domains*, 53

Blokhin, A. M., and D. L. Tkachev. *Asymptotic stability of the stationary solution for a new mathematical model of charge transport in semiconductors*, 357

Bressan, Alberto, Chen Jie Liu, Wen Shen, and Fang Yu. *Variational analysis of Nash equilibria for a model of traffic flow*, 495

Chan, C. Y., and T. Treeyaprasert. *Blow-up criteria for a parabolic problem due to a concentrated nonlinear source on a semi-infinite interval*, 159

Charalambopoulos, A. *On the reconstruction of low-frequency moments in acoustic scattering*, 311

Chen, Youpeng, and Lihua Liu. *The blow-up profile for a nonlocal nonlinear parabolic equation with a nonlocal boundary condition*, 759

Choksi, Rustum. *On global minimizers for a variational problem with long-range interactions*, 517

Chung, Jaywan. *Long-time asymptotics of the zero level set for the heat equation*, 705

Cimatti, Giovanni. *Existence and uniqueness for a two-point problem with an application to the electrical heating in an electrolyte*, 383

Cioranescu, D. *See* Banks, H. T.

Colombo, Rinaldo M., Graziano Guerra, and Wen Shen. *Lipschitz semigroup for an integro–differential equation for slow erosion*, 539

da Costa, F. P., M. Grinfeld, M. Langer, N. J. Mottram, and J. T. Pinto. *Kickback in nematic liquid crystals*, 99

Criner, A. K. *See* Banks, H. T.

Dassios, G., F. Kariotou, M. N. Tsampas, and B. D. Sleeman. *Mathematical modelling of avascular ellipsoidal tumour growth*, 1

Díaz-Cano, A., and F. González-Gascón. *Escape to infinity in the presence of magnetic fields*, 45

Fabrikant, V. I. *Exact evaluation of the integral involved in Doi-Edwards constitutive equations*, 787

Fino, Ahmad Z., and Mokhtar Kirane. *Qualitative properties of solutions to a time-space fractional evolution equation*, 133

Frid, Hermano. *Remarks on the theory of the divergence-measure fields*, 579

Gang, Xu, and Yin Huicheng. *Nonexistence of global weak solution with only one stable supersonic conic shock wave for the steady supersonic Euler flow past a perturbed cone*, 199

Giambò, Sebastiano, and Giuseppa Muscianisi. *Non-equilibrium relativistic two-phase flow with heat exchange*, 773

González-Gascón, F. *See* Díaz-Cano, A.

Grinfeld, M. *See* da Costa, F. P.

Guan, Chunxia, and Zhaoyang Yin. *Global weak solutions for a periodic two-component Hunter-Saxton system*, 285

Guerra, Graziano. *See* Colombo, Rinaldo M.

Guo, Bao-Zhu, and Zhi-Chao Shao. *Well-posedness and regularity for non-uniform Schrödinger and Euler-Bernoulli equations with boundary control and observation*, 111

Hadžić, Mahir, and Govind Menon. *Gradient flow structure for domain relaxation in Langmuir films*, 659

Herron, Isom H., and Pablo U. Suárez. *Exchange of stabilities in Couette flow between cylinders with Navier-slip conditions*, 743

Huicheng, Yin. *See* Gang, Xu

Humpherys, Jeffrey, and Kevin Zumbrun. *Efficient numerical stability analysis of detonation waves in ZND*, 685

Jiang, Jie, and Yanyan Zhang. *Counting the set of equilibria for a one-dimensional full model for phase transitions with microscopic movements*, 665

Jiang, Peng, and Dehua Wang. *Global weak solutions to the Euler-Boltzmann equations in radiation hydrodynamics*, 25

Jung, Soyeun, and Jinghua Yao. *Stability of ZND detonations for Majda's model*, 69

Kariotou, F. *See* Dassios, G.

Kausel, Eduardo, and Mirza M. Irfan Baig. *Laplace transform of products of Bessel functions: A visitation of earlier formulas*, 77
Keyfitz, Barbara Lee, and Charis Tsikkou. *Conserving the wrong variables in gas dynamics: A Riemann solution with singular shocks*, 407
Khludnev, Alexander. *Contact problems for elastic bodies with rigid inclusions*, 269
Kirane, Mokhtar. *See* Fino, Ahmad Z.
Kossioris, Georgios, and Christos Zohios. *The value function of the shallow lake problem as a viscosity solution of a HJB equation*, 625
Langer, M. *See* da Costa, F. P.
Li, Hai-Liang. *See* Zhong, Ming-Ying
Liu, Chen Jie. *See* Bressan, Alberto
Liu, Lihua. *See* Chen, Youpeng
Luo, Yang. *See* Zhu, Huiyan
Matioc, Bogdan-Vasile. *On the regularity of deep-water waves with general vorticity distributions*, 393
Menon, Govind. *See* Hadžić, Mahir
Mottram, N. J. *See* da Costa, F. P.
Muscianisi, Giuseppa. *See* Giambò, Sebastiano
Ohwa, Hiroki. *Existence of solutions to the Riemann problem for a class of hyperbolic conservation laws exhibiting a parabolic degeneracy*, 345
Pinto, J. T. *See* da Costa, F. P.
Ruggeri, Tommaso. *Can constitutive relations be represented by non-local equations?*, 597
Saxton, Katarzyna, and Ralph Saxton. *On the influence of damping in hyperbolic equations with parabolic degeneracy*, 171
Saxton, Ralph. *See* Saxton, Katarzyna
Schaeffer, Jack. *Slow decay for a linearized model of the solar wind*, 181
Shao, Zhi-Chao. *See* Guo, Bao-Zhu
Shen, Wen. *See* Bressan, Alberto
———. *See* Colombo, Rinaldo M.
Sleeman, B. D. *See* Dassios, G.
Slemrod, Marshall. *Chapman-Enskog ⇒ viscosity-capillarity*, 613
Slemrod, Marshall, and Amit Acharya. *Time-averaged coarse variables for multi-scale dynamics*, 793
Suárez, Pablo U. *See* Herron, Isom H.
Tkachev, D. L. *See* Blokhin, A. M.
Treeyaprasert, T. *See* Chan, C. Y.
Trivisa, Konstantina. *See* Ballew, Joshua
Trouvé, Alain, and François-Xavier Vialard. *Shape splines and stochastic shape evolutions: A second order point of view*, 219
Tsampas, M. N. *See* Dassios, G.
Tsikkou, Charis. *See* Keyfitz, Barbara Lee
Ulusoy, Süleyman. *See* Antman, Stuart S.
Vialard, François-Xavier. *See* Trouvé, Alain
Wang, Dehua. *See* Jiang, Peng
Winfree, W. P. *See* Banks, H. T.
Yao, Jinghua. *See* Jung, Soyeun
Yin, Zhaoyang. *See* Guan, Chunxia
Yu, Fang. *See* Bressan, Alberto
Zhang, Qiong. *Global existence and asymptotic behavior for a mildly degenerate Kirchhoff wave equation with boundary damping*, 253
Zhang, Yanyan. *See* Jiang, Jie
Zhong, Ming-Ying, and Hai-Liang Li. *Long time behavior of the Fokker-Planck-Boltzmann equation with soft potential*, 721
Zhu, Huiyan, and Yang Luo. *Dynamics of a delay differential equation model of phage growth in two-stage chemostat*, 299
Zohios, Christos. *See* Kossioris, Georgios
Zumbrun, Kevin. *See* Humpherys, Jeffrey
